## Intro:

C# A E B A E

## Verse 1:

C#                    A                    E  
Been here so long, I've forgotten who I am.  
C#                    A                    E  
Waiting on others I thought was my plan.  
C#                    A                    E  
I knew I needed someone to come lower me in,  
C#                    A                    E  
I never once imagined he would look like he did.

## Chorus 1:

B                    A                    E  
All he did was ask me what I want.  
B                    A                    E  
And when your souls like mine, it doesn't take too much though,  
C#                    B                    E  
Cuz He knew and I knew what was going on.

## Verse 2:

C#                    A                    E  
Healing my affliction was probably the easiest thing  
C#                    A                    E  
For this man to do it didn't cost him a thing.  
C#                    A                    E  
But when he said "My child, go sin no more"  
C#                    A                    E  
I could see in his eyes the tears that were gonna pour.

## Instrumental:

E C# A E A E B E

## Bridge

Bridge

C#            A            E

God won't you lift up my head,

C#            A            E

God won't you tell me I can.

C#            A                    E            A                    E            B                    E

God when I look in your eyes I can see the pain and love and the reason you died x2
